BRAZED TOOLS

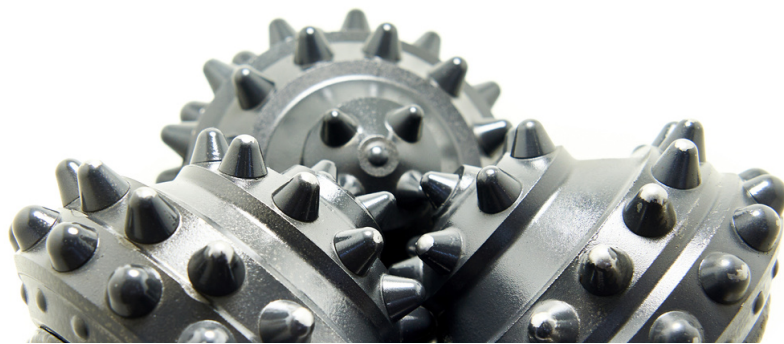

In **brazed tools**, the body and the blade are joined together through a **brazing process**.

There are a lot of different kinds of tools: saw blades, diamond wires, milling tools, drill bits and core drill bits, but also chippers, tools for medical field, digging and drilling tools, agriculture tools... And the list is still long!

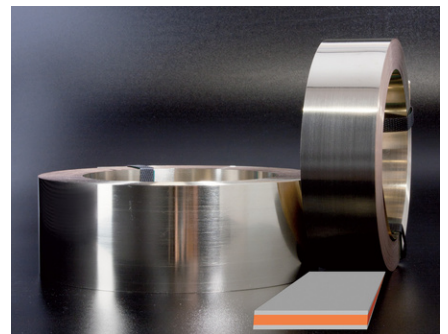

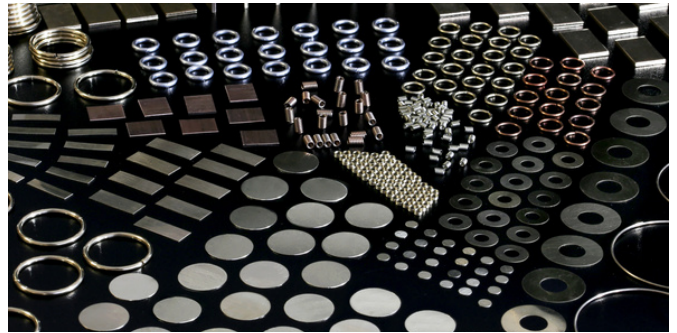

APPLICATIONS

Brazed tools are used in several fields, for working very different materials:

- Marble, granite and other natural stones
- Wood
- Aluminum
- Plastic
- Concrete
- Ferrous materials
- Heterogeneous materials.

OUR PRODUCTS

QUALITY AND COMPETENCE

Our selection dedicated to tool production includes silver alloys, copper alloys, nickel alloys, normal and special brasses.

We supply consumables in different make-ups: rods, wires, strips, trimetallic strips, powders, pastes, preforms from wire and strips (rings, arc rings, washers, rectangles and many other shapes).

In addition to top **quality** alloys, we also provide high-level **technical assistance** in choosing the most suitable alloys and the most performing brazing processes.
